

IDPH Grants – New Cloud Based System (EGrAMS)

The benefits of EGrAMS;

- Standardized system & processes
- Accessible from any computer with internet access
- Reduced time and labor
- Increase in productivity
- End to end tracking and monitoring
- Automated notifications & communication

WE'RE MOVING FROM PAPER TO ELECTRONIC!

The Illinois Department of Public Health (IDPH) is pleased to announce the transition from a paper-based grant application to its new cloud based Electronic Grants Administration & Management System (EGrAMS).

The current paper process is cumbersome, labor intensive and often redundant. EGrAMS will eliminate the burden of submitting paper applications, reduce time, labor and errors, and increase productivity.

With the launch of EGrAMS, we will now be able to assess grantee performance and use of funds, provide a more streamlined approach to progress reporting, and automate common grant management functions.

WHAT'S NEXT

Please stay tuned for changes to the IDPH Funding Opportunities webpage, as well as training opportunities and additional announcements in the upcoming months as we prepare to transition all of the Department's grant application processes from paper to an electronic format.
