BB-5 STOCKING – REPLACEMENT OF ALS MEDICATIONS

Initial ALS Medication Stock – Replacement:

- Damaged/outdated ALS medications should not be replaced from any emergency department unless:
 - The ED prefers this process.
- Providers are responsible for maintaining minimum numbers of ALS stock medications on each vehicle and for back-up stock.
- Providers have the option to stock/supply ALS medications through medication distributors of their choice or through system hospital pharmacies.

ALS Medications used in the Field:

- Providers replacing ALS stock medications used in the field with the receiving facility shall follow the receiving hospital's policy replacing/charging.
